Spotlight Exhibition Series

## Discipline Fusion

San Francisco, universally known for its rich artistic heritage, is also home to some of the most significant scientific breakthroughs of the modern era. This year, the Community Arts Council Spotlight Exhibition Series explores the combination of those two disciplines in a variety of media, creating a unique opportunity to explore art as science and science as art.

## Special Events

All month long, the Community Arts Council is hosting special fundraising events at galleries and museums throughout the city... cocktail receptions, dinners, openings, and a silent auction where you have a chance to purchase memorabilia from San Francisco's rich cultural and artistic history. No matter your budget, you'll find something to enjoy. Proceeds from all events fund scholarships for city youth summer art programs.

## Studio Tours

Every weekend in June, private studios throughout the city will be open to the public from 10 a.m. to 4 p.m. on the days listed. Meet the artists, view works in progress, and explore the creative environments that bring our city's artistic culture to life.
